

Fronius Network Setup - Customer Guide

If you have recently experienced no solar production data being shown on your SolarWeb account from your Solar Installation and have done either of the following:

- Changed Internet Provider
- Connected to the NBN
- Updated your Network Modem
- Changed your Network Password
- Connected to a New Network

Then use this Step-By-Step Guide to update your new network settings on your Fronius Inverter.

1. Firstly you will need to choose a Smartphone, Tablet or Other Device that you wish to use to connect to your Fronius Inverter and download the **Solar.web app**.

2. Go to where your Fronius Inverter is located and press the Back Button (3rd Button) on your Inverter to access your **Home Screen**.

3. Once on the home screen, you will need to use the Directional Buttons (1st and 2nd Buttons) to scroll the menu until you find **Setup**.

4. Press the Select Button (4th Button) to access the **Setup Menu**.

5. Scroll down with the Directional Buttons and Select: **Wi-Fi Access Point**.

6. Activate **Wi-Fi Access Point** with the Select Button.

7. Once this screen has appeared, switch to your Device and select **Wi-Fi Settings**.

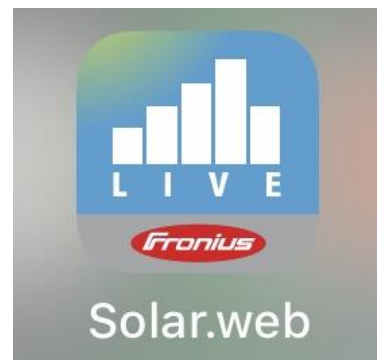

8. Connect the Wi-Fi on your device to your Fronius Inverter. **Password: 12345678**

Ensure that you stay within range of your Fronius Inverter for the following steps

9. Once connected to your Fronius Inverter, Open the **Solar.web App** on your Device, or download it from the store if you haven't already.

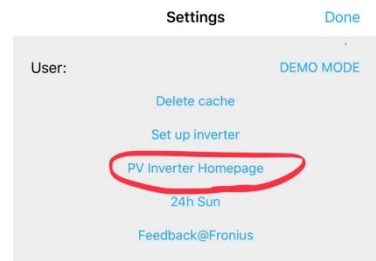

10. Ensuring that you are still connected to your Fronius Inverter, Select **Settings** on the home page of the app.

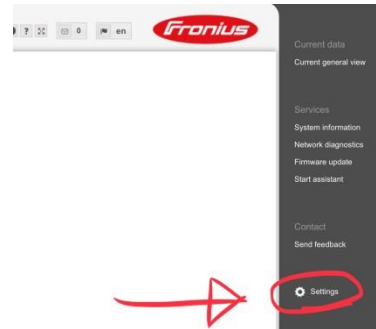

If you are unable to complete any of the following Steps, Repeat Steps 1 – 8 in order to re-connect to your Fronius Inverter

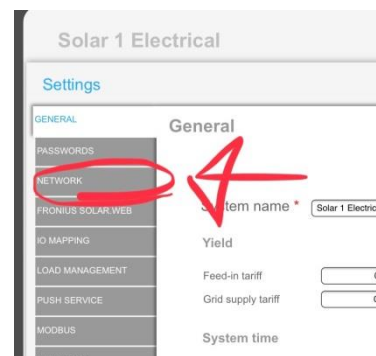

11. Select **PV Inverter Homepage** from the Settings Menu.

12. Select **Settings** on the PV Inverter Homepage.

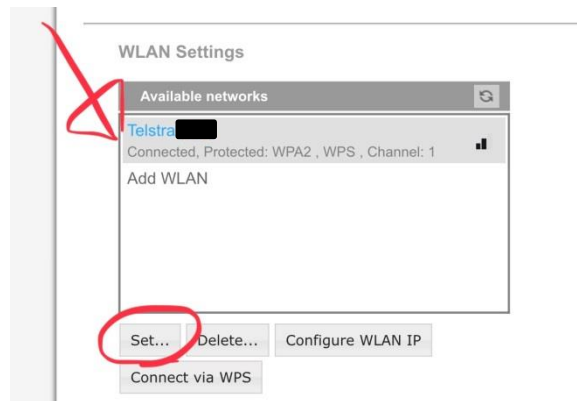

13. Select **Network** from the Settings Menu.

14. At the bottom of the Network Settings Menu you will need to select the new Network that you wish to connect to.

Once your Network has been selected, press **Set**.

15. Once you have selected Set, you will now have to enter the Password for your new Network and then select **Save**.

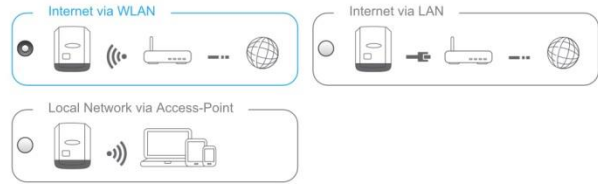

16. Now that you have successfully set your new network, select the **Tick Box** at the top of your page to apply your new Network to your Fronius Inverter.

Once this is successfully completed you will receive data from your Fronius Inverter on your SolarWeb account.
